DETAILED ACTION

Response to Arguments

1. Examiner took notice of the remarks and amendments made by applicant filed on 12/24/03.

Response to Amendment

2. This office action is in response to Amendment filed on 12/24/03.

Claim 7, 9-11, 13-15 are amended.

Claims 2, 5-6 are canceled.

3. Claims 1, 3-4, and 7-21 are pending.

Allowable Subject Matter

4. Claims 1, 3-4, and 7-21 are allowed.

5. Claims 1, 3-4, and 7-21 are considered allowable since prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations having a memory device among other features to include a foot transistor comprising a drain connected to the source of each read-pass transistor, and a ground-connected source, wherein the foot transistor is ON during a read operation on one of the memory cells and is OFF when no read operation is performed on any of the memory cells nor the foot transistor having a drain connected to the source of each read-pass transistor. The prior art of record also does not show the limitation of a plurality of foot transistors in one-to-one correspondence with the subsets of memory cells, each having a drain connected to the source of each read-pass transistor in the corresponding subset of memory cells; wherein during a read operation on a particular

Art Unit: 2818

memory cell belonging to a particular subset of memory cells belonging to a particular set of the memory cells, the foot transistor belonging to the plurality of foot transistors which is connected to the read-pass transistors in the particular subset of the memory cells is ON, where transistors belonging to the plurality of foot transistors are OFF if connected to a subset of memory cells in which no read operation is performed.
